

Black Ink selection for Red River Paper

The Ebert Digital Lab’s Epson inkjet printers use two different primary black inks - Photo Black or Matte Black. Each is optimized for a certain type of inkjet media.

Use Photo Black ink for reflective, glossy and satin papers, luster photo papers, baryta and platine type photo papers. Use Matte Black ink for cotton and matte inkjet media. Matte papers are typically smooth with a flat non-reflective surface.

Product	Ink
UltraPro Gloss 2.0	Photo Black
Arctic Polar Gloss	Photo Black
Polar Pearl Metallic	Photo Black
UltraPro Satin	Photo Black
